Don't include phone number

## PROJECTS

### **SMS SPAM CLASSIFICATION** [CLICK HERE TO VIEW](#)

worked to create a spam detection application on shiny,producing a accuracy of 0.99 on cross validated data set

### **ALL ROUND STUDENT EVALUATION SYSTEM**

Worked to create a Student Evaluation System, a tool which learns from large scale teacher feedback to predict a student is an all round student or not.It also suggest the key areas to improve to become an all round student.

### **NATURAL LANGUAGE TO SQL TRANSLATION**

Lead the development of a generic online SQL translation tool where scheme is taken from the user and the SQL is generated based on the natural language given.

**VIRTUAL STOCK MARKET** Virtual Stock Market is an online virtual money game,where users buys and sell stocks.The user with maximum money left in hand after the game stops is declared the winner.

**COURIER MANAGEMENT SYSTEM** Created a Java Swing application to manage the courier,employees and payment for a courier management company.This project was a course project which was completed successfully.

**AUTOMATIC TEXT COMPLETION** This was a simple JQuery application written to fetch the similar keywords from the database and list it.
